Art Unit: 1644

1. Claims 1-58 are pending.
2. Applicant's election without traverse of Group I, claims 1-3 and 7 in the reply filed on 9-28-04 is acknowledged.
3. Claims 4-6 and 8-58 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9-28-04.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3 and 7 are rejected under 35 U.S.C. 102 (a) or (b) as being anticipated by Riemen et al. (21 on the IDS submitted 8-16-02).

Riemen et al., teaches measuring NDPK activity by measuring NTP production in epithelial cells from mice with and without the CFTR gene mutation, a mutation that causes cystic fibrosis.

It is noted the rejection is made under 35 USC 102(a) or (b) because as far as the Examiner can ascertain, the abstract was presented at a meeting in April of 1998, but it is not known when the abstract book was made publicly available to the meeting attendees. As it is common for the abstract book to be mailed ahead of the meeting date, and applicant is a author on the reference being cited, it is incumbent upon applicant to ascertain the public availability of the abstract book, so the appropriate US statute can be applied.

The claimed invention is anticipated by the prior art teachings.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1644

6. Claims 1-3 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In base claims 1 and 7, there is no correlation step linking the determination or classification step with NDPK activity or function, as such the claim is indefinite.
